

Machine Learning Analysis Report

Generated On: 05-07-2026 09:10 AM

Dataset Information

Dataset	hard_ml_dataset.csv
Rows	120
Columns	5
Analysis Type	Classification

Algorithm Accuracy Comparison

Algorithm	Accuracy
Decision Tree	69.44%
Random Forest	86.11%
KNN	80.56%
SVM	86.11%

Best Performing Algorithm

Random Forest

AI Recommendation

After evaluating all machine learning models, **Random Forest** achieved the highest classification accuracy. Therefore, the system recommends **Random Forest** for this dataset because it provides the best predictive performance among all evaluated algorithms.

Conclusion

The uploaded dataset was successfully analyzed using four supervised machine learning algorithms. Their performances were compared using classification accuracy. Based on the

evaluation results, the system automatically identified the most suitable algorithm and generated this report. This automated recommendation helps users select an efficient machine learning model with minimum manual effort.
